Company Recruitment team
ScriptDash

December 4, 2016

Dear Ma'am/ Sir,

With respect to current openings, I would like to express my sincere interest to apply for the position of *Software Engineer*. I have gone through the description of the position, and considering my professional, and technical interests, I believe I would be a good fit for this position.

Being a **Graduate Computer Science student** with Databases as major, I have immense interest in **software/ web development**. During my work, and academic experience, I was involved in software development with focus on database management. To further my interest in the same field, I have taken courses like "Data Mining Techniques", "Parallel Data Processing in MapReduce using hadoop", and "Information Retrieval".

Also, during summer of 2015, I interned at **edx.org**, where I worked on developing a Python library which logs/profiles calls made by Django Model classes, and Python functions.

Contributing to open source project which is also the largest Python/Django project, and working on unexpected problems was particularly rewarding during this internship. Also, I learnt to follow strict coding standards, and meet impending deadlines. I was also exposed to agile s/w development, tools such as NewRelic, DataDog, JIRA, etc. Also, working at edx.org made me realise the huge impact of software development on the world.

Recently, I worked as a Co-op at ERT, a world leader in clinical software development. My work mainly involved developing, and maintaining a feature in JavaFX/Swing application. Also, I was responsible for making an Automation/RPC API bridging Java Application with Robot Framework. I was fortunate enough to implement infrastructure for Coding Standards.

Having gone through the website of ScriptDash, I am well aware of the culture of the company. I believe that my professional interests are aligned with job position as well as company values. I love to code, and creating a new product always excites me. I strongly believe that with my enthusiasm to learn, work hard, and mentoring from experienced professionals at ScriptDash, I will be a beneficial addition.

Thank you for your time, and consideration.

Yours Faithfully,

Utkarsh Jadhav
